

Seat Belts

Rear seat belts Cabriolet Models

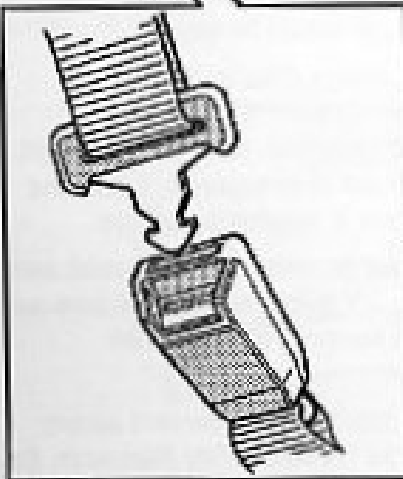

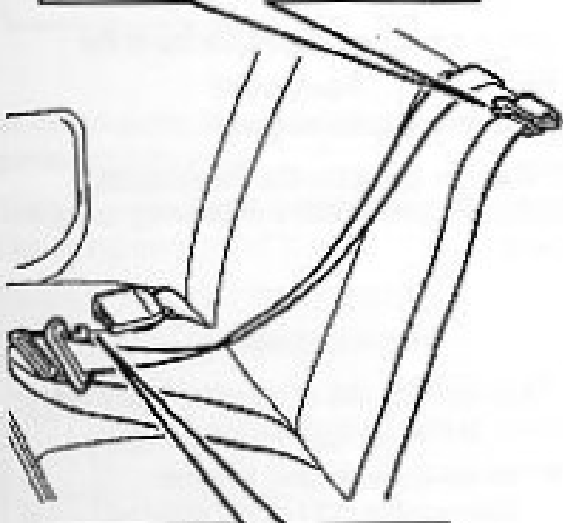

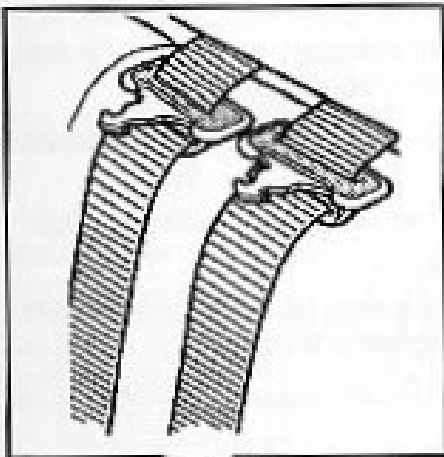

To fasten, pull the tongue plate over the shoulder and push into the lock nearest the wearer; a click indicates that the belt is locked into position.

Note: Withdraw the belt with a steady pull, a sudden snatch will lock the reel.

To release, press the RED release button. Stow the belt by allowing it to retract fully, manually assisting the last part.

CAUTION: Do not allow the belt to fly back unassisted.

Note: The rear seat of Cabriolet models is designed to carry two passengers only.
